

KEGIATAN PEMBELAJARAN 1

A. Tujuan Pembelajaran

Setelah kegiatan pembelajaran 1 ini diharapkan dapat:

- Mengidentifikasi *Passive Voice* dalam teks ilmiah, sesuai dengan konteks penggunaannya.
- Menerapkan *Passive Voice* dalam teks ilmiah, sesuai dengan konteks penggunaannya.

B. Uraian Materi

1. Pengertian *Passive Voice* (Kalimat Pasif)

***Passive Voice* (Kalimat Pasif) adalah kalimat yang subjeknya dikenai suatu perbuatan atau aktivitas.**

Kalau di Bahasa Indonesia, Kalimat pasif biasanya diawali oleh awalan imbuhan ter- atau di-.

Lalu bedanya dengan kalimat aktif apa ya?

***Active Voice* (kalimat aktif) adalah kalimat yang subjeknya aktif melakukan kegiatan atau aktifitas.** Maksudnya kalimat yang subjeknya melakukan pekerjaan atau melakukan perbuatan.

Untuk lebih jelas lagi perhatikan contoh berikut:

Active :

Dad washes the car once a week. (Ayah mencuci mobil sekali seminggu)

S V1 O

Passive :

The car is washed by Dad once a week. (Mobil dicuci oleh ayah sekali seminggu)

S to be+V3 O

Terlihat *kan* perbedaannya? Hanya dibalik saja Subjek dan Objeknya *loh*. Subjek pada kalimat aktif berubah menjadi Objek pada kalimat pasif, begitupun sebaliknya.

Coba lihat-lihat lagi, ada perbedaan lainnya tidak ya? Yap betul, imbuhan dari kata kerjanya berbeda. Untuk kata kerjanya hanya ditambahkan *to be* yang sesuai dengan tensesnya dan kata kerja diubah menjadi *verb 3*.

2. Kegunaan *Passive Voice*

Kalimat pasif ***Passive Voices*** biasa dipergunakan untuk:

- a. Menjelaskan dan menggambarkan proses / *to describe processes*:

After the tobacco leaves have been picked, they are dried.

- b. Memberi penegasan pada berita sehingga terasa lebih objektif /*to convey a more objective tone in news reports:*

Several people were arrested. They will be held in custody overnight.

- c. Memberi pengantar dalam kegiatan yang lebih akademik maupun formal, seperti surat, laporan, esei, dan perkuliahan / *more academic and other more formal settings – letters, reports, essays and lectures*

It is thought that the cause of the sudden increase in ...

3. BENTUK

Untuk membantuk kalimat pasif digunakan pola kalimat

Subject + Aux. Verb + V3.

Aux Verb akan berubah bentuk berdasarkan waktu kejadiannya yang dapat dijelaskan sebagai berikut:

Text 1

Mobile Phone

A mobile phone (also known as a wireless phone, or cellular telephone) is a very small portable radio telephone.

The mobile phone can be used to communicate over long distances without wires. It works by communicating with a nearby base station (also called a "cell site") which connects it to the main phone network. As the mobile phone moves around, if the mobile phone gets too far away from the cell it is connected to, that cell sends a message to another cell to tell the new cell to take over the call. This is called a "hand off," and the call continues with the new cell the phone is connected to. The hand-off is done so well and carefully that the user will usually never even know that the call was transferred to another cell.

As mobile phones became more popular, they began to cost less money, and more people could afford them. Monthly plans became available for rates as low as US\$30 or US\$40 a month. Cell phones have become so cheap to own that they have mostly replaced pay phones and phone booths except for urban areas with many people.

Text 2.

Tsunami

The term of "tsunami" comes from the Japanese which means harbour ("tsu") and wave ("nami"). A tsunami is a series of waves generated when water in a lake or the sea is rapidly displaced on a massive scale.

A tsunami can be generated when the sea floor abruptly deforms and vertically displaces the overlying water. Such large vertical movements of the earth's crust can occur at plate boundaries. Subduction of earthquakes are particularly effective in generating tsunamis, and occur where denser oceanic plates slip under continental plates.

As the displaced water mass moves under the influence of gravity to regain its equilibrium, it radiates across the ocean like ripples on a pond.

Tsunami always bring great damage. Most of the damage is caused by the huge mass of water behind the initial wave front, as the height of the sea keeps rising fast and floods powerfully into the coastal area.
